Conversation: ICWG Agenda - Drill Meeting

To Ice Core Community
Fr: Mark Twickler

Hello,

On March 30-31 the ICWG will be holding its annual meeting at the Denver Federal Center. Attached is the final draft agenda. If you have any questions regarding the meeting please let me know.

From Joan Fitzpatrick: - International Ice Drilling Technology Conference
Dear Colleagues -

The steering committee for the International Ice Drilling Technology Conference is pleased to announce that the 6th conference in this series will be held at the US Fish and Wildlife Service's National Conservation

Training Center in Sheperdstown, West Virginia, USA during the week of September 18, 2006. This conference is being sponsored by the US National Science Foundation, Office of Polar Programs. Please visit the conference website at <http://www.idt-workshop.unh.edu> to review the first circular, register your interest in attending, and to submit a short abstract. Please indicate your interest in attending by April 12 using the online form in order to assist us in our planning.

The 6th international conference comes at a time of exciting developments and challenges in the field of ice drilling and coring. The steering committee has designed an agenda for the meeting that will provide not only formal presentations, but also many opportunities for informal interactions including a poster and vendor session, a 'movie' evening for participants to share video recordings of recent drilling project activities, and a session on learning from failures.

We hope you'll join us for the conference to hear about all the latest activities in the realm of ice coring and drilling.

Sincerely -

Joan Fitzpatrick, Co-Chair
6th International Ice Drilling Technology Conference
