Re: Polar Palooza video podcasts  
Date: September 27, 2007

We wanted to bring to your attention a NSF funded project by the Division of Research on Learning in Formal and Informal Settings called "International POLAR-PALOOZA - Emphasizing the "I" in IPY & Enabling Global Conversations on the Antarctic Treaty" (Geoffrey Haines-Stile, PI Award # 0732879). The Palooza group was in Greenland this past summer and has created some video podcasts available on the web specifically on ice core drilling, Summit Station and air/snow exchange. These videos can be viewed at:

<http://passporttoknowledge.com/polar-palooza/pp06.php>

If you scroll to the bottom of the page you can download the videos in a variety of formats to view at your leisure. Be sure to check the Palooza webpage often since they are getting ready to head to Antarctica to continue producing video podcasts and other outreach products.

Happy viewing!
