**Conversation:** Future activities at NEEM

To: US Ice Coring Community

Congratulations to the NEEM team reaching the bottom of the Greenland Ice Sheet! Below is a message from Jim White regarding upcoming opportunities at NEEM. Please contact Jim directly if you have interest working on these upcoming samples. To learn more about NEEM, visit their excellent website at:

<http://neem.nbi.ku.dk/>

Mark

From Jim White:

Dear Colleagues,

The NEEM ice core in north-central Greenland has reached bedrock. NEEM is an international ice coring project co-funded by fourteen nations. The US, via NSF-OPP Arctic, is a major partner in the project.

Rock coring and basal ice sampling, including biological sampling, is scheduled to happen in 2012 at NEEM. It would be great to have US participation in this, and we are looking for US scientists who might have an interest in working on any aspect of the basal ice and/or the basal rock material.

If you are interested, please contact:
